What's New In?

The Mouse Odometer feature allows you to see the mouse usage of each open window. It may be useful to have a log of mouse usage by window, with or without a mouse movement. Using the feature you can generate a report of mouse usage for each open window, in seconds, minutes, or hours of use. You can easily remove or clean the report via the options included. This feature is aimed to complement other mouse usage features. The main log is the Mouse Hours log. When the mouse usage is less than the Mouse Hours value, the Report shows the mouse usage in seconds (with a log of minutes, with time increasing) When the mouse usage is equal to or greater than the Mouse Hours value, the report shows the mouse usage in minutes (with a log of seconds). Mouse Activity Monitor Description: Mouse Activity Monitor is a free up-to-date tool that monitors mouse activity for each of your open applications. It works with mouse-intensive programs such as Web Browsers, Photo Viewers and MS Paint, to get a grip on how much time you spend using the mouse. Report: The report for Mouse Activity Monitor gives an overview of mouse activity for each application during the test period. You will see the number of mouse clicks and mouse-movements (scrolling and dragging) for each application during the test period. You will be able to see which application is eating up most of the mouse activity. You will also be able to see the mouse activity for each of the mouse buttons and hover activities in the report as well. Mouse usage by mouse buttons and mouse buttons hover activities for each application are also recorded. You will be able to remove or clean the report in seconds. This is a free tool that will remind you how much time you spend on the mouse for each of your open programs. It works with mouse-intensive programs such as Web Browsers, Photo Viewers and MS Paint, to get a grip on how much time you spend using the mouse. The tool will monitor mouse activity for each of your open applications. It will give you the number of mouse clicks and mouse-movements (scrolling and dragging) for each application during the test period. It will also give you the mouse activity for each mouse button and mouse button hover activities for each application in the report. It will also give you the mouse usage by mouse buttons and mouse buttons hover activities for each application in the report.

System Requirements:

Buyers note: Please carefully consider your computer system/hardware/software requirements. A good Internet connection is essential. The software includes: 1. No Internet connection is required for installation. (However, you may need to be connected to the internet to activate it). 2. The final count of users and contacts are stored on your hard drive. When you no longer need the program, delete them to avoid the use of disk space. 3. The screenshots are also stored on your hard drive. When you no longer need the program, delete
